01 / COMPANY PROFILE

Local experience. International perspective.

Azericert LLC provides services in management system and product certification, conformity assessment, inspection, testing and training.

We assess the needs of public and private sector organisations in the context of their activities, applicable standards and market requirements. We clarify the scope of work and identify the relevant assessment pathway.

2006

the start of our journey

Expertise matched to your needs

01 Certification

Management systems, products and sector-specific schemes.

02 Inspection

Technical assessment, periodic checks and examinations.

03 Testing services

Electrical safety, gas and equipment testing.

04 Sustainability

Carbon and water footprints, environmental product declarations.

05 Audit and assessment

Internal audits and supplier assessments.

06 Professional training

Management systems knowledge and auditor competence.

PRECISION | TRANSPARENCY | PROFESSIONAL EXPERTISE

02 / MANAGEMENT SYSTEMS

A systematic approach to better management.

Bring quality, safety, environmental performance and business continuity requirements together in a coherent management approach.

ISO 9001

Quality management

Process consistency and attention to customer requirements.

ISO 14001

Environmental management

Management of environmental aspects and impacts.

ISO 45001

Occupational health and safety

A systematic approach to risks in the workplace.

ISO/IEC 27001

Information security

Management of information assets and security risks.

ISO 22000

Food safety management

Management of hazards and controls across the food chain.

ISO 50001

Energy management

Monitoring energy use and energy performance.

ISO 37001

Anti-bribery management

Management measures addressing bribery risks.

ISO 22301

Business continuity

Preparedness for disruption and operational recovery.

Integrated management systems connect the common requirements of multiple standards. The applicable standard edition and certification scope are established for each project.

03 / INDUSTRY AND PRODUCT CONFORMITY

Technical confidence. From product to process.

Conformity assessment and safety-related services for manufacturing, construction and technical operations.

01 Inspection and periodic checks

Equipment examinations, periodic inspections and technical assessment services.

02 Laboratory and testing services

Electrical safety testing (LVD), gas-related tests and equipment testing services.

03 Product conformity and CE marking

Assessment pathways and CE marking services appropriate to the product category.

04 Welding and production quality

Assessment opportunities for sector requirements such as EN ISO 3834 and EN 15085-2.

The scope of work is defined with reference to the product, equipment, technical documentation and applicable requirements.

04 / FOOD AND AGRICULTURE

From farm to supply. Confidence in the chain.

Sector-specific assessment services for food producers, feed businesses, agricultural operations and exporters.

Food safety

ISO 22000 • HACCP • FSSC 22000 • BRCGS

Food safety approaches across production, processing and supply.

Feed safety

GMP+ • FAMI-QS • FEMAS

Sector-specific assessment schemes for feed and feed ingredients.

Agriculture and organic products

GLOBALG.A.P. • Organic certification

Selection of international schemes appropriate to the farm and product.

Specific market requirements

Halal • Rainforest Alliance • NOP • JAS

Services aligned with the destination market and the scope of the applicable scheme.

The applicable scheme, product scope and certification body are clarified during the initial assessment.

05 / ENVIRONMENT AND SUSTAINABILITY

Measure your impact. Inform your progress.

Environmental calculation and reporting services help you prepare for customer expectations and supply chain requirements.

01 Organisational greenhouse gases

ISO 14064-1

Calculation and reporting of greenhouse gas emissions at organisation level.

02 Product carbon footprint

ISO 14067

Assessment of the carbon footprint across a product life cycle.

03 Water footprint

ISO 14046

Assessment of environmental impacts associated with water use.

04 Environmental product declarations

EPD • ISO 14025 • EN 15804

Work on product environmental information and relevant declarations.

CBAM emissions reporting

Collection, calculation and reporting of emissions data for applicable products. The scope depends on the product and reporting requirements.

06 / AUDIT AND TRAINING

Turn knowledge into practical capability.

Develop your team's understanding of standards, process assessment and audit preparedness.

01

Internal auditor training

Audit planning, evaluation of evidence, documenting findings and reporting.

02

Lead auditor training

Programmes focused on the knowledge and skills needed to audit management systems.

03

Corporate training

Training programmes covering standard requirements, process-based approaches and integrated management.

Audit and assessment

Internal and supplier audits to assess processes, supply chains and conformity with defined requirements.

Training topics

ISO 19011

Management system auditing

ISO 31000

Risk management

ISO 10002

Complaints handling

ISO 26000

Social responsibility

Training is available on these guidance standards. Completing a training course is distinct from certification of an organisation's management system.

07 / SECTOR SOLUTIONS

Relevant expertise. For your industry.

We connect general management standards with sector-specific requirements, product characteristics and market expectations.

01	**Industry, construction and transport**	Inspection, periodic examinations, product conformity and welding-related requirements including EN ISO 3834 and EN 15085-2.
02	**Automotive and aerospace**	Quality management pathways relating to IATF 16949 and AS 9100.
03	**Healthcare and medical devices**	Quality management under ISO 13485 and healthcare information security topics under NEN 7510.
04	**IT and service organisations**	Information security under ISO/IEC 27001, service management under ISO/IEC 20000-1 and business continuity under ISO 22301.
05	**Textiles and consumer products**	GOTS, organic products and good manufacturing practices for cosmetics under ISO 22716.
06	**Hospitality and service businesses**	Service quality, hygiene, food safety and customer satisfaction for hotels and catering businesses.

Availability, the delivery organisation and the scope of work for specialist standards and schemes are confirmed upon enquiry.
